

Appropriate Assessment Screening Determination

New MV overhead line - Gurrane Tie Line, Cahersiveen, Co. Kerry

In accordance with Article 6(3) of the EU Habitats Directive (Directive 92/43/EEC) and Regulation 42(1) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, ESB has undertaken Screening for Appropriate Assessment to assess, in view of best scientific knowledge and the conservation objectives of the site, if the project, individually or in combination with other plans or projects is likely to have a significant effect on a European Site(s).

The project relates to the construction and operation of a new MV overhead line to the south of Cahersiveen, Co. Kerry, between the existing Gurrane 38 kV substation and the townland of Hillgrove. The works will involve the erection of 36 wooden poles and the subsequent stringing of the overhead line conductor. In this context, particular attention was paid to the following European Sites, which the works are located within 2 km of:

- *Iveragh Peninsula SPA (004154)*¹
- *Valencia Harbour / Portmagee Channel SAC (002262)*²

In accordance with Regulation 42(7) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, ESB has made a determination following screening that an Appropriate Assessment is not required as the project is not directly connected with or necessary to the management of the sites as European sites and as it can be concluded, on the basis of objective information, that the project, individually or in combination with other plans or projects is not likely to have a significant effect on any European sites.

This determination is based on the location, scale, extent and duration of the proposed development, including temporary works and excludes any consideration of mitigation measures.

Full records of the assessment, reports, surveys, consultations and observations are held by the competent authority and available for public review as requested.
