

## **Enduring Connection Policy - 2.3 (ECP-2.3) 2022 Category A Batch**

**June 2023**

**Disclaimer**

All information provided is for information purposes only and does not constitute a legal contract between either System Operator and any person or entity unless otherwise specified. Prior to taking business decisions, interested parties should not rely on the data set out in this information paper as a substitute for obtaining separate and independent advice to the matters covered by this document. Information in this document does not amount to a recommendation or advice in respect of any possible investment. The use of information contained within this document for any form of decision making is done so at the user's own risk.

## Background

ECP-2 is the second stage of the CRU's development of enduring connection policy in Ireland. On the 10<sup>th</sup> June 2020 the CRU published their decision<sup>1</sup> on ECP-2, which set policy for at least three annual batches of connection offers (ECP 2.1, ECP-2.2, and ECP-2.3).

The application window for the third batch, ECP-2.3, closed 30<sup>th</sup> September 2022. The System Operators (SOs) have used the ECP-2 decision paper<sup>1</sup> and subsequent ruleset<sup>2</sup> to determine which applicants have been initially successful in making the list of 84<sup>3</sup> projects due to receive connection offers under Category A.

This report contains the final list of applicants that will be processed under Category A as part of the 2022 ECP-2.3 batch following payment of the balance of application fees to the relevant SO. As per the decision paper, the first 25 projects in category A were selected on the basis of renewable output, with the projects having the largest volume of renewable GWhrs/yr generated being granted the highest priority. The subsequent projects were selected in order of planning permission grant date. There is a cap of 10 primarily storage and other system service technology projects in each ECP-2 batch - apart from these projects, all eligible applications to ECP-2.3 were accepted into the Category A batch.

Please note that the projects in Category A may change should projects not proceed with their application, or no longer be deemed eligible.

Applicants are summarised in the table below:

Generator Type	Total Applications	Total Sum of MEC (MW)
Solar	49	1,797
Wind	11	422
Battery	7	555
Gas	1	500
Anaerobic Digester	1	7
Hybrid Wind and Battery	1	64.8 Wind 25 Battery
Hybrid Solar and Battery	4	140.8 Solar 97 Battery
<b>Total Applications</b>	<b>74</b>	<b>3,609</b>

<sup>1</sup> <https://www.cru.ie/wp-content/uploads/2020/06/CRU20060-ECP-2-Decision.pdf>

<sup>2</sup> <https://www.eirgridgroup.com/site-files/library/EirGrid/ECP-2-Ruleset-Final.pdf>

<sup>3</sup> The cap on the primarily storage and other system service technology projects dictates that the ECP-2.3 Category A batch contains 84 projects

### ECP-2.3 –Final List of Projects for Category A

\*Please note that the 'assumed nodes' have been assigned based on Gate 3 Nodal Assignment Rules and are for guidance purposes only. They are subject to change once studies commence.

\*\* Please note that 'Offer Quarters' are a reasonable estimate and to be used for guidance purposes only. Offer quarters remain subject to review and may change after studies commence and the complexity of the node is confirmed.
