Re: Power Factor requirements for Type C, D and Type B < 5 MW WFPS connections in MPID 35 – MPID 35

Dear Keith,

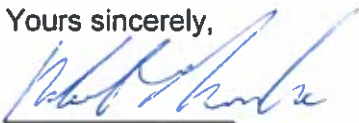

I refer to your correspondence to the CER of 24th March 2016 seeking approval of Distribution Code modification MPID 35, as recommended at Distribution Code Review Panel (DCRP) meeting on 8th March, 2016.

The CER is satisfied that ESNB has recommended this modification for approval by the CER in accordance with the relevant provisions set out in the Distribution Code for the handling of revisions and that the views of stakeholders have been adequately considered and addressed.

Having considered the modification and its supporting documentation the CER approves this modification. The CER notes the concerns raised at the DCRP meetings and request the DSO to consider this issue when reviewing the charges applying to connecting generators.

The CER directs ESNB to revise the Distribution Code which shall be deemed to be amended accordingly from the latter of the date of this letter.

Yours sincerely,

Robert O'Rourke

Manager, Electricity Networks
