Smart Meters

January 2019

AREKIBO

Overview

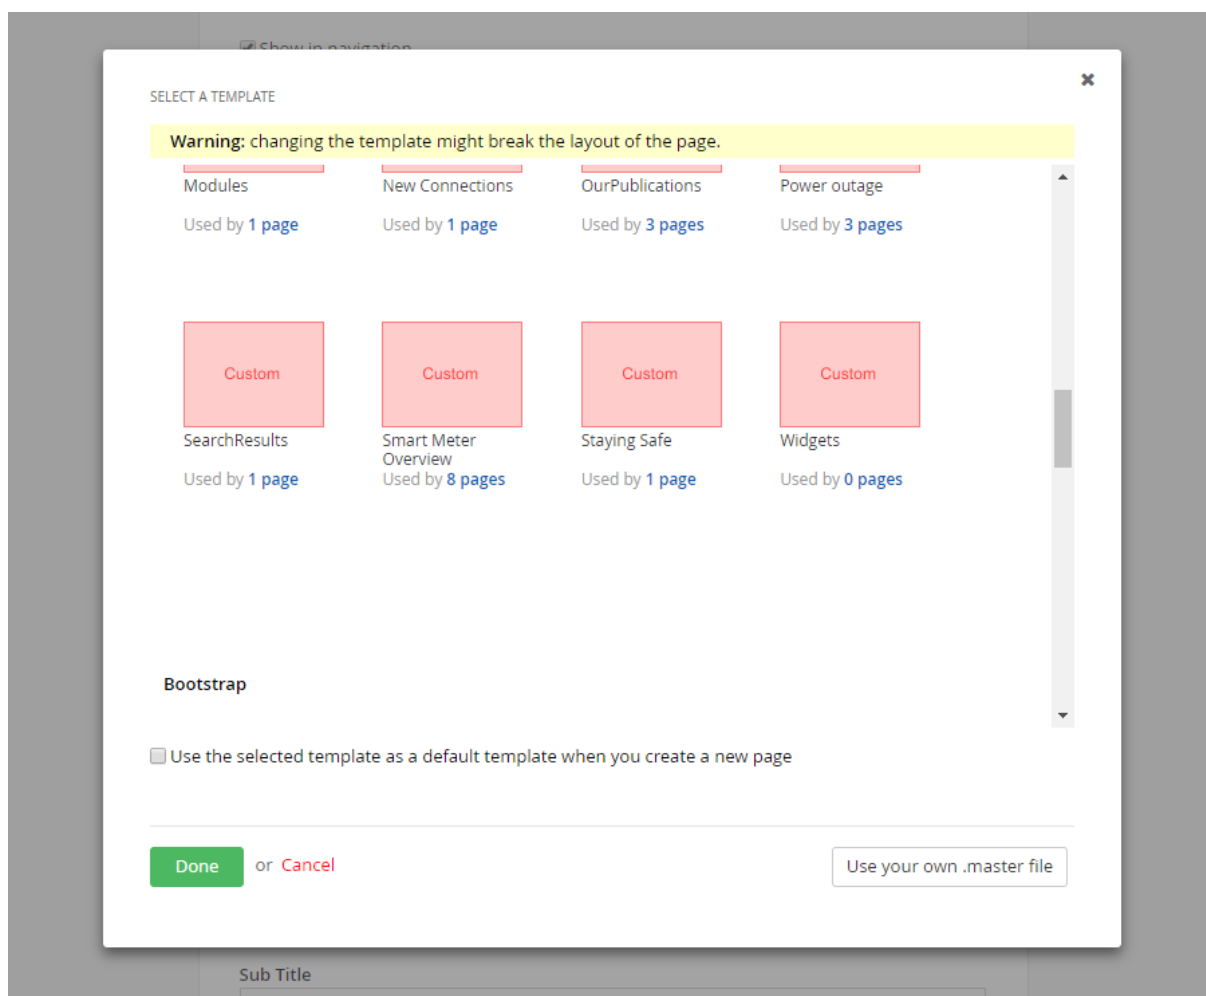

The following is a guide to accessing and updating widgets in the Smart Meters section of the ESB Networks website – esbnetworks.ie

Arekibo have built Sitefinity templates for both a landing page and a standard content page, both of which can be edited through the CMS. Please see guidelines below.

Template

The template for the landing page can be found in the following section of the CMS

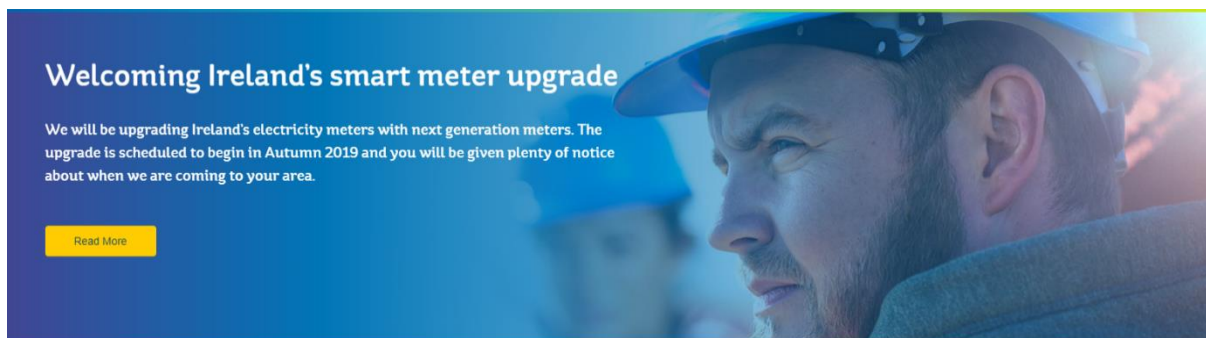

When creating a new page, you can select the following template 'Smart Meter Overview'.

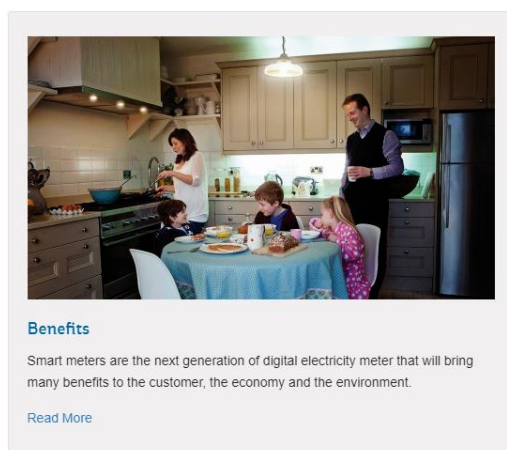

Spotlights & Image Sizes

There are 4 different images that can be edited in through the CMS, please see examples below and the corresponding specs.

Overview Banner widget can be added (example below): desktop=1100x434 mobile= 300x244

Overview Spotlight widgets can be added as below, these include an image, title, body text and call to action.

Spotlight 1: 489x280

Benefits

Smart meters are the next generation of digital electricity meter that will bring many benefits to the customer, the economy and the environment.
